CONTENTS

1	Introduction	2
2	Related Work	3
2.1	Human Computation	3
2.2	Human-Computer Interaction	3
2.3	Network Analysis	3
3	The Disaster Monitoring System	3
3.1	Game Design	3
3.1.1	User Motivation	3
3.1.2	User Work-flow	3
3.2	Aggregation Model and System Design	3
3.2.1	Task Generator	3
3.2.2	Player Rating Model	3
3.2.3	Disaster Level Evaluation Model	3
3.2.4	Data Persistence	3
4	Prototype	3
4.1	Requirements Selection	3
4.2	Front-end System	3

4.3 Back-end System	3
5 Discussion	3
5.1 Model Evaluation	3
5.2 Social and Ethical Aspects Issues	3
6 Conclutions	3
ABSTRACT Abstract test	

1 INTRODUCTION

Introduction cite test [1]

2 RELATED WORK

2.1 HUMAN COMPUTATION

2.2 HUMAN-COMPUTER INTERACTION

2.3 NETWORK ANALYSIS

3 THE DISASTER MONITORING SYSTEM

3.1 GAME DESIGN

3.1.1 USER MOTIVATION

3.1.2 USER WORK-FLOW

3.2 AGGREGATION MODEL AND SYSTEM DESIGN

3.2.1 TASK GENERATOR

3.2.2 PLAYER RATING MODEL

3.2.3 DISASTER LEVEL EVALUATION MODEL

3.2.4 DATA PERSISTENCE

4 PROTOTYPE

4.1 REQUIREMENTS SELECTION

4.2 FRONT-END SYSTEM

4.3 BACK-END SYSTEM

5 DISCUSSION

5.1 MODEL EVALUATION

5.2 SOCIAL AND ETHICAL ASPECTS ISSUES

6 CONCLUTIONS
